DETAILED ACTION

After-Final Amendment

1. Receipt is acknowledged of the after-final amendment filed 11 September 2007.

Allowable Subject Matter

2. Claims 1-18 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The applicant's arguments filed 11 September 2007 are persuasive. The best prior art of record, of Chalmers and Kreft fails to specifically teach the limitations of the intelligent portable device with a contactless interface that utilizes inductive coupling, mainly that the peripheral circuit and central data processing circuit are not electrically connected to one another, that the first communication interface is connected to the peripheral circuit and a second communication interface is connected to the central processing circuit, and that the central data processing circuit and the peripheral circuit exchange data via the respective communication interfaces though a station.

Hence the best prior art of record fails to teach the invention as set forth in claims 1-18 and the examiner can find no teaching of the specific intelligent portable device, nor reasons within the cited prior art or on her own to combine the elements of these references other than the applicant's own reasoning to fully encompass the current pending claims. In addition, see applicant's reasoning in amendment/response filed 11 September 2007.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2876

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
